

Timothy DeMay Financial Solutions Core Platform

When investing, it's beneficial to have a consistent plan to deliver over full market cycles. Our core platform is designed to align with a client's risk tolerance and rebalance accordingly to stick with that tolerance for the lifetime of the portfolio. If the client's needs or goals ever change, so can the portfolio.

These 10 profiles, consisting of a blend of equity and income strategies, systematically rebalance using various rules and thresholds depending on what fund manager is used. The ultimate goal is to capture market upside in times of growth and limit downside risk during market declines.

Profile Strategies

Stability — Preserving Your Wealth

Profiles 1-5 span the Stability segment of the risk/return spectrum and these investors generally have a shorter time horizon and can't afford heavy losses. These strategies are designed to meet the needs of investors who want to minimize downside risk and we aim to accomplish this goal using systematic rebalancing that can help stabilize the portfolios and lower the overall volatility.

Growth — Building Your Wealth

Profiles 6-10 span the Growth segment of the risk/return spectrum and these investors generally have a longer time horizon and are looking to accumulate wealth. These strategies are designed to meet the need of investors who can afford to recover from short-term losses in periods of high market volatility because goal fulfillment is many years or even decades down the road.
